The STACBOND® panel has an external 5005 and internal 3005/3105 aluminium alloy and is coated with the highest quality PvdF 70/30 paint (polyvinyl fluoride) that offers the highest resistance to ageing.

The manufacture of STACBOND® Composite Panel follows a controlled process by way of rigorous tests and quality controls.

El panel STACBOND® posee una capa exterior de aluminio de aleación 5005 e interior 3005 / 3105 y está lacado con pintura de la más alta calidad PvdF 70/30 (polivinilo fluorado), ofreciendo la más elevada resistencia al envejecimiento.

La fabricación del Panel Composite STACBOND® sigue un proceso controlado mediante rigurosos ensayos y controles de calidad.

Le panneau STACBOND® avec une couche extérieure en alliage d'aluminium 5005 et intérieure 3005 / 3105 et laqué à la peinture PvdF 70/30 (polyvinyle fluoré), offre une haute résistance au vieillissement.

La fabrication du Panneau Composite STACBOND® répond à un processus de contrôle rigoureux validé par des essais et des audits de qualités.
